CURRICULUM

ODM EDUCATIONAL GROUP

ANNUAL CURRICULUM PLAN | SESSION 2024 - 25

The Annual Curriculum Plan refers to a comprehensive document or outline that provides a structured overview of the educational content and activities to be covered throughout an academic year. It serves as a roadmap for teachers, administrators, and educational institutions to ensure a coherent and balanced delivery of the curriculum.

Objectives of the ACP

- 1. Learning Objectives:** This plan includes specific learning goals and objectives for each subject or topic. These objectives define what students are expected to know, understand, and be able to do by the end of the year.
- 2. Content Outline:** It provides a breakdown of the content to be covered in each subject area. This may include subtopics, chapters, or units to be addressed during different periods of the academic year.
- 3. Assessment and Evaluation:** It specifies assessment methods, such as tests, projects, or presentations, that will be used to evaluate student progress and understanding. It may also include information about grading criteria and the frequency of assessments.
- 4. Integration and Interdisciplinary Connections:** In some cases, it will highlight opportunities for integrating subjects or making interdisciplinary connections. This promotes a holistic and interconnected approach to learning.
- 5.** It serves as a guiding document for teachers; helping them stay organised and focused throughout the academic year. It provides a framework for instructional planning, content delivery, and assessment, ensuring a consistent and well-rounded educational experience for students.
- 6. Resources and Materials:** It also includes the list of the textbooks, supplementary materials, and resources needed for effective teaching and learning. It ensures that teachers have access to appropriate resources to support the curriculum.

Objectives | CBSE Curriculum

1. It aims to provide a comprehensive and holistic educational experience to students.
2. **Child-Centric Approach:** The CBSE curriculum places the student at the centre of the learning process. It recognizes the individuality, abilities, and interests of each student and aims to cater to their unique needs. The curriculum promotes student engagement, critical thinking, and overall development.
3. **Learning Outcomes:** The CBSE curriculum focuses on clearly defined learning outcomes. It specifies the knowledge, understanding, skills, and attitudes that students should acquire at each grade level. Learning outcomes help in setting clear expectations and provide a framework for teaching, learning, and assessment.
4. **Interdisciplinary Approach:** The CBSE curriculum encourages an interdisciplinary approach, integrating knowledge and skills from multiple subjects. It emphasizes connections between different subjects, promoting a holistic understanding of concepts and their real-world applications.
5. **Life Skills and Values:** CBSE places significant importance on the development of life skills and values among students. The curriculum includes components that aim to cultivate values such as honesty, empathy, respect, and responsible citizenship. It also focuses on developing essential life skills such as communication, critical thinking, problem-solving, and collaboration.
6. **Inclusion and Diversity:** CBSE curriculum promotes inclusivity and caters to the diverse needs of students. It recognizes the importance of providing equal opportunities and adapting teaching and assessment strategies to accommodate learners with different abilities, backgrounds, and learning styles.

B. Learning Outcomes

Name of the Chapter	Learning Outcomes
1.Number System	<ul style="list-style-type: none"> Compares numbers as greatest and smallest and also learnt to arrange them in ascending and descending order Explore larger numbers like 10lakh and crore
2.Estimation and Approximation	<ul style="list-style-type: none"> Estimates the given number to the nearest place while finding the sum, difference and product using general rules.
3.Numbers in Indian and International Systems	<ul style="list-style-type: none"> Learns to express a given number using commas
4.Natural Numbers and Whole Numbers	<ul style="list-style-type: none"> Recognizes predecessor and successor of a given number Expresses addition, subtraction and multiplication on the number line Learns and applies properties of whole numbers in simplifying calculations
5.Negative Numbers and integers	<ul style="list-style-type: none"> Describes integers with examples of temperature scale, water level in lake or river, level of oil in tank expresses addition of integers and subtraction of integers on a number line. Observes that when we have the same sign then we have to add and put the same sign but when two negative integers are added we get a negative integer
6.Sets	<ul style="list-style-type: none"> Learn about set & its elements. List element of a finite set. Describe the rule that defines a set. Learns to represent a set.

Name of the Chapter	Learning Outcomes
7.Fractions	<ul style="list-style-type: none"> • Represent fractions on the number line and identifies improper and proper fractions along with their equivalent fractions • Compare like fractions
8.Decimal Fractions	<ul style="list-style-type: none"> • Recognizes number of decimal places • Learns like and unlike decimal numbers • Converts a given fraction to decimal and vice-versa. • Solves addition, subtraction, multiplication and division of decimal numbers.
9.Playing With Numbers	<ul style="list-style-type: none"> • Learns to find factors and multiples of a given number • Learn how to find HCF & LCM • Applies the tests for divisibility of numbers • Discovered that if two numbers are divisible by a number then their sum and difference are also divisible by that number
10.Ratio and Proportion (Including Unitary Method)	<ul style="list-style-type: none"> • Recognizes proportions. • Solves day to day problems related to proportions • Uses unitary method in solving various word problems.
11.Percent	<ul style="list-style-type: none"> • Converts a given fraction or decimal into percentage or vice-versa. • Expresses one quantity as a percentage of other. • Increasing and decreasing percentage calculates. • Applies percentage to solve day to day problem.

14.Fundamental Operations	<ul style="list-style-type: none"> • Calculates addition, subtraction, multiplication and division of algebraic terms by different methods.
15.Framing Algebraic Expressions	<ul style="list-style-type: none"> • Frames algebraic expression from a given statement. • Simplifies algebraic expressions.
16.Simple Linear Equations	<ul style="list-style-type: none"> • Solves a linear equation using transposition. • Solves day-to-day problems by framing linear equations.

Name of the Chapter	Learning Outcomes
17.Fundamental Concepts (Geometry)	<ul style="list-style-type: none"> Learn different types of lines Study about open & closed figures.
18.Angles and its Properties	<ul style="list-style-type: none"> Draws an angle with the help of protractor. Measures an angle with the help of protractor. Explore the properties of different types of angles. Understands parallel lines
19.Triangles	<ul style="list-style-type: none"> Learns different types of angles. Explores altitude and median of a triangle.
20.Quadrilateral	<ul style="list-style-type: none"> Learns the property of quadrilaterals Explores the types of quadrilaterals.
21.The Circle	<ul style="list-style-type: none"> Understands circle, diameter, radius, chord, secant, tangent, segment and sector.
22.Symmetry	<ul style="list-style-type: none"> Finds Symmetry in nature Explores various symmetrical objects in the surroundings Applies Line of Symmetry in various objects
23.Constructions	<ul style="list-style-type: none"> Constructs circles, linesegments, perpendiculars ,perpendicular bisectors of line segment, angle and the bisectors, triangle etc. Learns to draw different anglesof given measures using onlyruler and compasses.
25.Perimeter and Area of Plane figures	<ul style="list-style-type: none"> Calculate the perimeter and area of square, rectangle, equilateral triangle and closed figure.
26.Data Handling	<ul style="list-style-type: none"> Interprets pictographs and bargraphs Learns how to represent a givendata by using both bar graph aswell as a pictograph
7.Fractions	<ul style="list-style-type: none"> Verifies the multiplication and division of fractions Problems involving fractions in day to day use
9.Playing With Numbers	<ul style="list-style-type: none"> Learns to find factors andmultiples of a given number Learn how to find HCF & LCM Applies the tests for divisibility ofnumbers Discovered that if two numbersare divisible by a number thentheir sum and difference are alsodivisible by that number
