

CHEMISTRY WEBINAR-2021

Chemistry is a BIG part of our everyday life. One can easily observe this branch of science in different spheres of human life such as in the food we eat, the air we breathe, the various cleansing agents we use, so much so that even human emotions are sometimes a result of chemical reactions within our body!

METALS form the largest group in the periodic table, and they are also defined according to their position in the periodic table. They are grouped as alkali metals, alkaline earth metals, transition metals, heavy metals and rare earth metals. So, let's come together to learn and discuss on **"A Journey from Coordination compounds to Metal-Organic frameworks"** with our Resource person **Dr.Rojalin Sahu**, Associate Professor in the Department of Chemistry, KIIT University. She will be enriching your minds with her inputs which will definitely help you to understand Metals better.
