CHANGING YOUR TOMORROW

LEARNING OBJECTIVE

To enable the learner to know about:

- **Globe**
- **Map**
- **Compare between globe and map**
- **Know the difference between sketch and map**

The Globe

- The globe is a small model of the Earth.
- It is the most accurate way of looking at the size, shape and location of places on the Earth.
- It is the most accurate three - dimensional representation of the earth.
- Globe shows the continents and oceans accurately.

Drawbacks of Globe

- Only a part of the earth can be seen on a globe, at one glance.
- All details can not be marked on a globe.
- A globe is difficult to carry around.
- To avoid these problems, we normally use maps instead of a globe.

What is a map?

A map is a representation or a drawing of the earth's surface or a part of it drawn on a flat surface according to a scale.

What is a sketch?

Sketch or a plan is a rough map with outlines drawn without a scale.

Difference between a Map and a Sketch

Map	Sketch
It has a scale	It has no scale
It is a carefully drawn area or a place	It is a roughly drawn area or a place
It requires the use of a special instrument	It requires no use of a special instrument
