READING COMPREHENSION (UNSEEN PASSAGE)

Read the passage carefully and answer the questions.

Bears are found in Europe, Asia, Africa and America. They are massively built, with short tails and thick legs. Bears are not really carnivore. They eat almost anything. The chief exception is the polar bear which in its natural state lives on fish and seals. However, in captivity, they seem to enjoy meat, vegetables, fruits, milk, rice etc.

Bears are not quite as dangerous as people imagine them. Like most animals, they will do their best to avoid human beings. However bears are by no means cowardly animals. Many hunters have been killed by bears for they can be extremely dangerous and cunning.

Answer these questions

1. Where are bears found?
2. What does a bear eat in captivity?
3. What does bear avoid like most animals?
4. Explain the body feature of a bear.
5. Spot and write two verbs from the above passage.
