LEARNING OBJECTIVE

Children will come to know:

1. All minute details about how day and night are occurring and why different seasons are there on earth.
2. About rotation and revolution.

CW:

Answer the following questions.

4. In the month of June it is summer in the Northern Hemisphere and winter in the Southern Hemisphere. Why?

Ans. In the month of June it is summer in the Northern Hemisphere and winter in the Southern Hemisphere because the North Pole is tilted towards the Sun, the South Pole is tilted away from the Sun.

5. Why do the seasons repeat year after year?

Ans. The seasons repeat year after year as the revolutionary behaviour of the Earth continues as well as the fact that earth is permanently tilted on its axis; the earth goes through the same behaviour each year.

· HW

Learn the question and answers of chapter -3
