

SESSION NO-2

CLASS:II

SUBJECT : COMPUTER

CHAPTER NUMBER:3

CHAPTER NAME :HOW DOES A COMPUTER WORK?

SUB TOPIC: BRAIN DEVELOPER

CHANGING YOUR TOMORROW

LEARNING OBJECTIVE :

To enable the students to know about input, output and processing.

Input:

- The data and instructions that we enter into computer are called Input.
- Keyboard and mouse are used to input data

Process:

- Working on data is called Processing.
- CPU works on the data and does all the thinking and calculations.

Output:

- Output means the final result.
- After CPU finishes processing the data the output is displayed on the monitor.
- Example of Output devices such as monitor, printer.

$$\boxed{4} \quad \boxed{+} \quad \boxed{3} \quad \boxed{=} \quad \boxed{7}$$

Here 3 and 4 are inputs or Data. 7 is the Result or output. + is the instruction.

A. Fill in the blanks using the words given in the hints box.

Output, Data and instructions, Letters, Numbers, Processing, Input, Pictures

1. The data that we enter into the computer is known as Input.
2. Output is the result given by a computer.
3. When a computer works on the data, it is called processing.
4. We enter Data and instructions into the computer.
5. Data can be letters, numbers, words, and pictures

B. Write T (True) or F (false)

1. Data typed into a computer is called output. **False**
2. A computer cannot work on its own. **True**
3. Monitor and printer are the most common input devices. **False**
4. We get output from the computer. **false**

SECTION-B

Tick the right answer

1. Which among the following parts of a computer does all the calculations?

- a. Speaker b. CPU c. Mouse

2. What are the data and instructions together known as?

- a. Output b. Process c. Input

3. Which part of a computer works like a human brain?

- a. CPU b. Monitor c. Printer

LEARNING OUTCOME:

Students will learn about input, output and processing.

THANKING YOU
