Lymph

- Lymph: Lymph is similar to blood but RBCs are absent in lymph. Lymph is formed from the fluid which leaks from blood capillaries and goes to the intercellular spaces in the tissues. This fluid is collected through lymph vessels and finally returns to the blood capillaries. Lymph also plays an important role in the immune system.

- [https://www.youtube.com/watch?v=2p1P3- Rb4o](https://www.youtube.com/watch?v=2p1P3-Rb4o)

- What is lymph?
- What is the difference between lymph and blood?

THANKING YOU
ODM EDUCATIONAL GROUP.
