8. In a three day football tournament, on the 1st day there were 24196 people, on the 2nd day there were 16899 people and on the 3rd day there were 31245 people. Find the total number of people watched the football tournament on the three days.

$$\text{ANS. Number of people on 1st day} = \begin{array}{r} 1 \ 1 \ 2 \ 2 \\ 2 \ 4 \ 1 \ 9 \ 6 \end{array}$$

$$\text{Number of people on 2nd day} = \begin{array}{r} 1 \ 6 \ 8 \ 9 \ 9 \end{array}$$

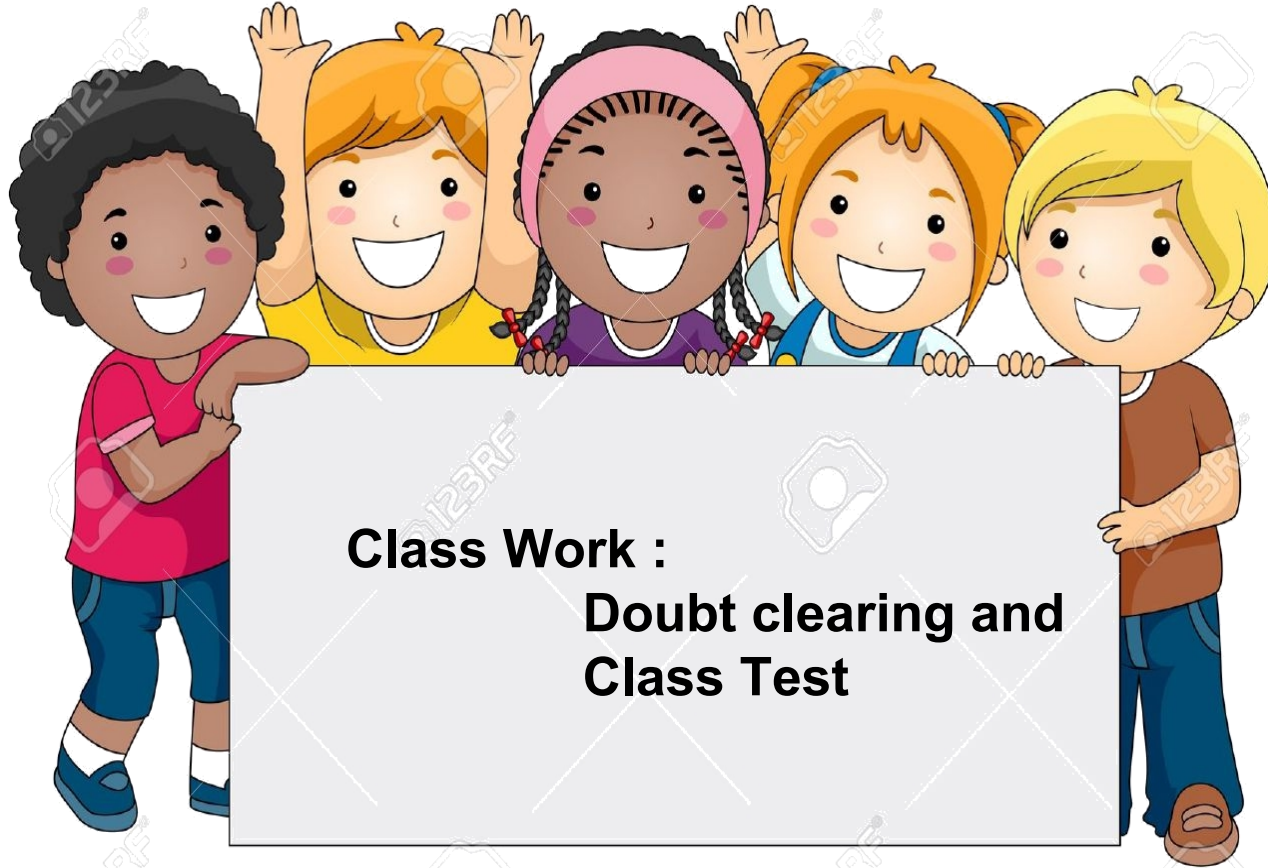

$$\text{Number of people on 3rd day} = \begin{array}{r} + \ 3 \ 1 \ 2 \ 4 \ 5 \\ \hline \end{array}$$

$$\text{Number of people on three days} = \begin{array}{r} 7 \ 2 \ 3 \ 4 \ 0 \end{array}$$

∴ 72340 people watched the football tournament.
