SUMMARY:

- ❑ The part of a plant which grows above the ground is called root of the plant.
- ❑ The main function of the stem is to hold the plant upright and support its branches.
- ❑ Leaves help a plant to prepare its own food, breathe and give out extra water.
- ❑ Most fruits have seeds inside them. Seeds are usually protected inside the fruit.

LEARNING OUTCOME :

Students come to know –

- participate more actively in class discussion and
- know the meanings of the new words.
