

SESSION : 8
CLASS : III
SUBJECT : SCIENCE
CHAPTER NUMBER : 12
CHAPTER NAME : GOING INTO SPACE
SUB-TOPIC : LONG QUESTIONS AND ANSWERS

CHANGING YOUR TOMORROW

LEARNING OBJECTIVE :

Learners will be able to –

- ❖ solve long Q/A and some extra Q/A

LET'S RECAPITULATE:

Choose the correct answer.

1. First Indian women to go into the space was Kalpana Chawla.
a) Sunita Williams b) Kalpana Chawla c) both a & b d) none of these
2. Kalpana Chawla went in the space shuttle Columbia.
a) Colombo b) Columbia c) Namibia d) all of these
3. Sunita Williams stayed in space in her spacecraft for 195 days.
a) 159 b) 185 c) 195 d) only a
4. Inside the spacecraft astronauts conduct _____.
a) experiments b) examinations c) only b d) neither a nor b

B.ANSWER THESE QUESTIONS.

1. Why is there no life on the moon?

Ans: There is no air or water on the moon. So there are no plants or animals or people on the moon.

2. What do astronauts do in space ?

Ans: The astronauts conduct experiments some times they need to repair the spacecraft in the space.

3. When did Kalpana Chawla die and how ?

Ans: Kalpana Chawla died on 1st February 2003 when her space shuttle crashed on the return journey.

B. Give answer in one-word.

1. Special vehicles which have the power and speed to take us away from the earth's gravitational force. Spacecraft

2. Big holes on the surface of the moon. Craters

3. The layer of air that surrounded the earth. Atmosphere

4. A natural satellite of the earth and it has no air or water.

Moon

SUMMARY:

- Space is beyond the layer of air around the earth.
- The force of attraction of the earth is called gravity.
- Space rockets are used to escape from the earth's pull and enter into space.
- There is no air or water on the moon. Thus, there is no life on the moon.
- Space travellers give us information about space.
- Two Indian women have travelled into space.

LEARNING OUTCOME:

Learners will able to –

- solve long Q/A and some extra Q/A
