Extra questions

Q1. What are causes of air pollution?

A- The particles and gases can come from car and truck exhaust, factories, dust, and wildfires.

Q2. What are measures we should take for air pollution?

A- We can cycle or walk to nearby places instead of taking a car or bus, to save on fuel and control air pollution.

Q3. What are causes of water pollution?

A. Household waste and sewage are often dumped in rivers and lakes. Factories also produce a lot of waste that flows into rivers and other water bodies in cities. All these lead to water pollution.

Activity
