SUB-TOPIC : LONG Q AND A

CHANGING YOUR TOMORROW

LONG Q AND A

ANSWER THE FOLLOWING

1. What did the early humans eat in the beginning?

Ans: Early humans ate wild fruits and roots, and initially hunted small animals.

2. Where did early humans live and what kind of clothes did, they wear?

Ans: Early humans lived in natural caves or under large trees and they used to cover themselves with the skins of animals or leaves of trees.

3. How did early humans make a fire?

Ans: They used to make fire by rubbing two stones or two bamboo sticks together.

LONG Q AND A

ANSWER THE FOLLOWING

4. How was fire useful to early humans?

Ans: Fire helped to keep away wild animals and the cold. Also, the fire made the flesh of animals tastier and easier to eat.

5. Which discovery made it possible for humans to settle down in one place?

Ans: Discovery of farming made it possible for humans to settle down in one place.

6. Why did early humans settle near rivers?

Ans: The plants needed water and fertile soil to grow well so the early humans settled near rivers.

LONG Q AND A

ANSWER THE FOLLOWING

7. How was the first sledge made?

Ans: The early humans first learnt to make carts that could be pulled along the ground, which were called sledges. They used animals to pull the sledges but they could move only on the grounds.

8. How did early humans get the idea of the wheel?

Ans: The early human has seen the round logs of wood rolling down a hill and realized that round things could move more easily on land. So, they fitted small pieces of tree trunks below their carts and the cart could now move easily on uneven ground. Thus, the wheel was invented.

LEARNING OUTCOME:

Learners will come to know -

- About the long questions and answers.

HOME ASSIGNMENT:

Write the long question and answers in note book.
