SUBJECT- SOCIAL SCIENCE

CHAPTER NUMBER: 10

CHAPTER NAME : MEANS OF TRANSPORT

SUBTOPIC : LONG Q/A

CHANGING YOUR TOMORROW

Air Transport

- Aeroplanes and helicopters are the means of air transport.

Aeroplane

- Aeroplanes fly from airports.
- The larger planes can carry hundreds of passengers at a time.
- They can cover long distances in a very short time. So, most people travelling from one country to another use aeroplane.

Helicopter

- Helicopters are used mainly for military purposes and to send food, clothes and medicines to places affected by floods or earthquakes.
- They are also used to reach places that cannot be reached by buses, trains or aeroplanes, like highly mountainous regions.

Water Transport

- Water transport is one of the oldest modes of transport.
- It is also one of the cheapest modes, Boats, steamers, and ships are means of water transport.
- People use boats to cross rivers. Ships carry people and goods across seas and oceans.

Answer the following questions.

1. What do you understand by the term 'means of transport'?

Ans-Transport means to move people or things from One place to another. The vehicles used to transport people and goods are called means of transport.
