

**SESSION : 8**

**CLASS : V**

**SUBJECT : MATHEMATICS**

**CHAPTER NUMBER: 5**

**CHAPTER NAME : OPERATIONS ON LARGER NUMBERS**

**SUBTOPIC : Revision work-2, Compute these and Story sums**

---

**CHANGING YOUR TOMORROW**

---

## LEARNING OBJECTIVE

# Students will be able to practice previous knowledge and prepare for Periodic test.

**Q. No.1 Compute these :**

- a) Add :  $3,65,68,418$  ;  $75,80,115$  ;  $24,37,000$
- b) Subtract :  $5,34,231$  from  $8,98,786$
- c) Multiply  $3451 \times 532$
- d) Divide :  $87,392$  by  $32$
- e) Simplify :  $32,34,567 + 44,12,367 - 52,18,937$

## Q. No.2 Story sums :

- a) Population of a city is 23,43,681. Out of this 12,21,834 are male . What is the number of females in this city ?
- b) 1,02,504 items are to be packed in trays, 12 items can be packed in a tray. How many complete trays be packed ?
- c) A factory makes 6400 cakes of soap daily. How many cakes of soap will it make in a week?

# ANSWERS

**Q. No.1 Compute these :**

a) Add : 3,65,68,418 ; 75,80,115 ; 24,37,000

Ans. 4,65,85,533

b) Subtract : 5,34,231 from 8,98,786

Ans. 3,64,555

c) Multiply  $3451 \times 532$

Ans. 18,35,932

d) Divide : 87,392 by 32

Ans. 2,731

e) Simplify :  $32,34,567 + 44,12,367 - 52,18,937$

Ans.  $76,46,934 - 52,18,937 = 24,27,997$

## Q. No.2 Story sums :

- a) Population of a city is 23,43,681. Out of this 12,21,834 are male . What is the number of females in this city ?

Ans. Population of a city = 23,43,681

Number of male = 12,21,834

The number of females =  $23,43,681 - 12,21,834$   
 $= 11,21,847$

So, the number of females in the city is 11,21,847.

## Q. No.2 Story sums :

b) 1,02,504 items are to be packed in trays, 12 items can be packed in a tray. How many complete trays be packed ?

Ans. Number of items can be packed in one tray = 12

Total number items = 1,02,504

Number of complete trays to be packed =  $1,02,504 \div 12$   
= 8,542

Thus, 8,542 complete trays can be packed.

## Q. No.2 Story sums :

c) A factory makes 6400 cakes of soap daily. How many cakes of soap will it make in a week?

Ans.

Number of cakes of soap a factory makes in one day = 6400

(One week = 7 days)

Number of cakes of soap a factory will make in 7 days =  $6400 \times 7$   
 $= 44,800$

Thus, the factory will make 44,800 cakes of soaps in a week.

## **LEARNING OUTCOME**

**Students are be able to revise the previous class work.**

**HOME WORK**  
**Practice for PT-1**

**THANKING YOU**  
**ODM EDUCATIONAL GROUP**
