## LEARNING OBJECTIVE

- ✓ Making students have a thorough practice on different parameters.

**Read the following passage.**

**The most valuable thing in the world is the time because most of the things in the world can be increased or decreased, but it is not in one's control to extend even a single moment of time. As time goes on, a person has nothing but remorse. Time is even more important for the student. The aim of student life is to get an education.**

**Education can be achieved only by the use of time. Students who lose their valuable time in sports, fun, and laziness are repentant throughout their life because they are deprived of getting a good education and are unable to progress in life. Instead of worrying about the moments that have passed, it is the duty of man to make good use of those which are now in front of us.**
