

SESSION : 8

CLASS : II

SUBJECT : EVS

CHAPTER NUMBER: 14

**CHAPTER NAME : HOW THE WHEEL WAS
INVENTED**

**SUBTOPIC : TEXTUAL QUESTION- ANSWER THE
FOLLOWING QUESTIONS**

CHANGING YOUR TOMORROW

LEARNING OBJECTIVE :

- To enable the learner to know about the textual questions of the chapter.

HOW THE WHEEL WAS INVENTED

Let's Recapitulate

1. Where did the early people live?
2. What did the early people eat?
3. How did the early people carry the light things after hunting?
4. Who had invented the wheel?

- The early human lived in the forest and ate roots and fruits grew in the forests.
- When they hunted or killed small animals, they carried them in their back to their homes.
- But when they hunted large animals, like bison or elephant, it was not easy to drag or pull these animals along the ground over long distance.

- Nobody knows who invented the wheel. Perhaps, someone saw a log or a piece of wood from a tree roll down a hill.
- With that log it was easy to carry heavy things.
- With the passing of the time, early people realized that heavy things could move easily with the round logs.

C.W Answer the following questions

1. How did the early humans bring home the small animals they hunted?
 - A) The early humans carried the small animals after hunting on their back and brought it to their home.

2. How did the early humans bring home the large animals that they hunted?

A) It is very difficult to drag large animals for early humans. So with the passing of time, they put the large animals on a log and rolled them along.

3. What could have led to the invention of the wheel?

A) With time, early people realised that they could move heavy things easily with the help of wheel which led to the invention of the wheel.

LEARNING OUTCOME:

- ❖ The learner will be able to know about the textual questions.
