

WELCOME TO THE ONLINE CLASS

SESSION NO: 1

CLASS: 4

SUBJECT: SCIENCE

CHAPTER NUMBER: 3

CHAPTER NAME:

**SUB TOPIC: INTRODUCTION, SAFETY AT HOME & SAFETY
AT SCHOOL**

CHANGING YOUR TOMORROW

LEARNING OBJECTIVE

Learner will able to

- **understand how accidents happen.**
- **deal with emergencies at home and at school .**

INTRODUCTION

- Newspaper carry news of accidents almost everyday.

Elderly man dies in traffic accident

A 75-year-old North Fort Myers driver died Monday after he was hit by an oncoming car on North Tamiami Trail, Florida Highway Patrol Trooper Mark Boatright said.

According to Boatright: John Robert Brown of 25 Fletcher Drive was driving a 1977 Plymouth southbound on North Tamiami Trail, 2.8 miles north of Fort Myers, when he was hit by a car driven by Mark Shannon Lovell, 28, of 1698 Nalle Road, North Fort Myers, about 6:14 p.m. Monday.

Lovell, driving a 1988 Datsun, was northbound and passing other northbound vehicles. He ran into Brown's car, spun 180 degrees and hit Brown's car again.

Lovell suffered a broken leg and facial injuries. He and Brown were rushed to Lee Memorial Hospital, where Brown died three hours later. Lovell was listed in fair condition late Thursday.

He was charged with driving too fast for road conditions, improper passing and driving with a suspended license.

OFF THE BLOTTER

to a downtown Fort Myers parking lot, said Fort Myers police Sgt. Dan Jera.

According to Jera: Judy Lane, 38, of 305 Tarpon Drive in Cape Coral, and Philip Torocco, 37, of 18486 Poinciana Rd. in Fort Myers, were walking toward the lot at Lee Street and Anderson Avenue at about 5 p.m. Tuesday when they were approached.

The men asked the couple for cigarettes before brandishing a handgun. They took all the money in Lane's purse and Torocco's wallet.

The two men sped away east on Anderson Avenue.

One of the two black men was

MUMBAI-AGRA HIGHWAY

Accident claims lives of five doctors in Nashik, one injured

The six were returning to Pimpalgaon Baswant after attending a meet

EXPRESS NEWS SERVICE
PUNE, MAY 18

The mangled remains of the car. (Below, L-R) Doctors Sanjay Tiwari, Pratap Shelke, Chandrashekhar Gangurde, Kundan Jadhav and Suresh Patil who died in the mishap. Express

FIVE DOCTORS from Pimpalgaon Baswant town in Nashik district lost their lives while another was seriously injured after the car they were travelling in hit an unidentified heavy vehicle from behind on the Mumbai-Agra highway in the early hours of Monday.

Nashik Rural police said the incident took place around 2.30 am when the doctors were returning to Pimpalgaon Baswant in a multi-utility vehicle (MUV) after attending a medical practitioners' meet in Nashik city.

The police have identified the deceased doctors as Dr Pratap Shelke (48), Dr Suresh Patil (40), both gynecologists, Dr Sanjay Tiwari (55), a cardiologist, Dr Chandrashekhar Gangurde (55) and Kundan Jadhav (45), both pediatricians. The injured person has been identified as Dr Amol Bhosle. The accident took place near Kankangaon village in Ozar taluka.

Inspector Prakash Medhe, in charge of Ozar police station and the investigating officer in the case, said, "As per our primary investigation, the car in which these doctors were travelling rammmed into a heavy vehicle from behind. There is a speed-breaker at the accident spot. Based on the location of the speed-breaker and the tyre marks, it seems the heavy vehicle suddenly applied brakes and driver of this car could not control the speed. The car was very badly damaged."

Inspector Medhe added, "The police control room received a call from the staffers of a nearby petrol pump who had heard a loud sound of the collision. The five doctors had sustained very severe injuries, they died on the spot."

The police said the bodies were handed over to the family members after post-mortem. All five doctors were well known in Pimpalgaon Baswant town.

ACCIDENTS

- **Accidents:** An unfortunate incident that happens unexpectedly and unintentionally, typically resulting in damage or injury.

What is an Accident?

INJURIES

- Injuries at home are mostly caused by slipping on the floor, burns, electric shocks, and chemical poisoning.

SAFETY AT HOME

SLIPPING ON THE FLOOR

- Keep the floor dry and clean.
- Do not leave your toys and other things lying on the floor.
- Use a step ladder or a stool to reach something placed high.

SAFETY AT HOME

BURNS

- Accidents due to a fire in the kitchen can cause serious injury (or even death)
- To avoid such accidents one must not wear synthetic clothes in the kitchen. Such clothes catch fire easily.
- Gas stoves when not in use must be turned off.

SAFETY AT HOME

ELECTRIC SHOCKS

- Do not touch electric fittings with wet hands.
- Do not go too close to table fans or heaters if they are on.
- If someone gets an electric shock or sees a spark, the main switch must be turned off immediately.

ELECTRIC SHOCKS

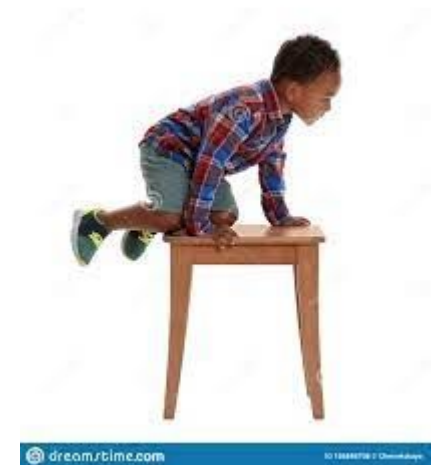

POISONING

- Accidental consumption of chemicals and medicines can cause poisoning.
- Poisonous chemicals should be properly labeled and kept away from eatables.
- Do not take medicine without asking an adult.

SAFETY AT SCHOOL

- Do not rush up or down the stairs. You may fall and hurt yourself and others.
- Do not climb on desks and chairs or throw things around.

SUMMARY

- **Accidents:** An unfortunate incident that happens unexpectedly and unintentionally, typically resulting in damage or injury.
- **Injuries at home are mostly caused by slipping on the floor, burns, electric shocks, and chemical poisoning.**
- **If someone gets an electric shock or sees a spark, the main switch must be turned off immediately.**
- **Do not rush up or down the stairs. You may fall and hurt yourself and others.**
- **Do not climb on desks and chairs or throw things around.**

Quiz Time

1. An unfortunate incident that happens unexpectedly is known as _____.

Ans: accident

2. Use a _____ to reach something placed high.

Ans: step ladder

3. If someone gets an _____ , the main switch must be turned off immediately.

Ans: electric shock

Homework

HOMework

- **Write the difficult words in your notebook.**

LEARNING OUTCOME

Learner will able to

- **understand about the stars and planets.**
- **distinguish between stars and planets.**
