ANSWER THESE QUESTIONS

3. What is first aid?

Ans: First aid is the medical help given to an injured or a sick person before proper medical aid arrives.

4. Write about two common emergencies where you need first aid.

Ans: Common emergencies where we need first aid are minor cuts and insect bites.

ANSWER THE LONG QUESTIONS

1. What precautions should you take to avoid accidents at school?

Ans: To avoid accidents in school following precautions can be taken:

- Do not rush up or down the stairs. You may fall and hurt yourself and others.
- Do not climb on desks or chairs or throw things around.

2. As a pedestrian, what will you do to avoid getting hurt on the road?

Ans: To avoid getting hurt on road, one must cross the road only at the zebra crossing.

- First look to your right, then to your left, and then to your right again.
- Cross the road when the traffic stops.
- Walk on the footpath and do not rush or start in time on the road.

ANSWER THE LONG QUESTIONS

3. How will you help a person who has a bleeding wound?

Ans: If someone has a bleeding wound then the following steps can be followed:

- First, wash with water.
- Then apply an antiseptic lotion over it.
- If there is bleeding from the cut, try to stop it by putting a bandage on the cut.
- Send to the doctor immediately.

4. How will you help a person who has fainted?

Ans: If a person faints,

- make him lie down with his head at a level lower than the body.
- Allow fresh air around the person.
- Loosen his clothes and sprinkle cold water on his forehead.
- Let the person rest quietly and send for a doctor.

ANSWER THE LONG QUESTIONS
