

SESSION : 4
CLASS : IV
SUBJECT : MATHEMATICS
CHAPTER NUMBER : 12 & 13
CHAPTER NAME : MEASUREMENT & GEOMETRY
**SUBTOPIC : REVISION WORK – 2 (CHOOSE THE
CORRECT ANSWER & SOLVE THE
FOLLOWING QUESTIONS)**

CHANGING YOUR TOMORROW

LEARNING OBJECTIVE

- Enable the students to recall the chapters through this revision work.

REVISION WORK - 2

A. Choose the Correct Answer.

1) _____ is the standard unit of capacity.

- a) Millilitre b) kilolitre c) litre d) none of these

2) $3\text{m} =$ _____ cm.

- a) 100cm b) 600cm c) 300cm d) 400cm

3) To convert grams into kilograms, we divide number of grams by _____.

- a) 1000 b) 100 c) 10 d) none of these

4) A line segment has _____ end points.

- a) 1 b) 2 c) 3 d) 4

REVISION WORK - 2

A. Choose the Correct Answer.

5) A _____ has no breadth, no thickness and no end points.

- a) Line segments b) Ray c) Line d) none of these

6) Non parallel lines are always _____ lines.

- a) Parallel b) Intersecting c) None

7) Radius = _____ \div 2.

- a) Centre b) Diameter c) Radius d) none of these

REVISION WORK - 2

B. Solve the following questions.

- 8) Find the radius of circle whose diameter is 40 cm.
- 9) Find the diameter of circle whose radius is 23 m.
- 10) Draw one example of curved and straight line.
- 11) A tin contains $17\ell\ 650\text{m}\ell$ of oil. $8\ell\ 985\text{m}\ell$ of oil is wasted due to leakage in the tin. How much oil is left in the tin?
- 12) A man buys $6\text{kg}\ 600\text{g}$ potato, $4\text{kg}\ 700\text{g}$ tomatoes and $3\text{kg}\ 250\text{g}$ onions. How much do these vegetables weigh together?

REVISION WORK - 2

ANSWER

REVISION WORK - 2

A. Choose the Correct Answer.

1) Litre is the standard unit of capacity.

a) Millilitre b) kilolitre c) litre d) none of these

2) 3m = 300 cm.

a) 100cm b) 600cm c) 300cm d) 400cm

3) To convert grams into kilograms, we divide number of grams by 1000.

a) 1000 b) 100 c) 10 d) none of these

4) A line segment has 2 end points.

a) 1 b) 2 c) 3 d) 4

REVISION WORK - 2

A. Choose the Correct Answer.

5) A line has no breadth, no thickness and no end points.

- a) Line segments b) Ray c) Line b) none of these

6) Non parallel lines are always intersecting lines.

- a) Parallel b) Intersecting c) None

7) Radius = diameter \div 2.

- a) Centre b) Diameter c) Radius b) none of these

REVISION WORK - 2

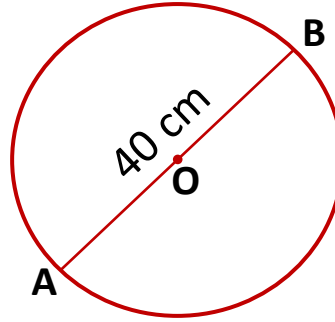

B. Solve the following questions.

- 8) Find the radius of circle whose diameter is 40 cm.

$$D = 40$$

$$\text{Radius} = \frac{\text{Diameter}}{2}$$

$$R = \frac{40}{2} = \mathbf{20\text{cm}}$$

- 9) Find the diameter of circle whose radius is 23 m.

$$R = 23$$

$$\text{Diameter} = 2 \times \text{Radius} = 2 \times R$$

$$D = 2 \times 23 = \mathbf{46\text{m}}$$

REVISION WORK - 2

B. Solve the following questions.

- 10) Draw one example of curved and straight line.

Example of curved line =

Example of straight line =

REVISION WORK - 2

B. Solve the following questions.

- 11) A tin contains $17\ell\ 650\text{ml}$ of oil. $8\ell\ 985\text{ml}$ of oil is wasted due to leakage in the tin. How much oil is left in the tin?

A tin contains total oil = $17\ell\ 650\text{ml}$

Total oil wasted due to leakage = $8\ell\ 985\text{ml}$

total oil left in the tin =

	ℓ	ml
	16	15 14 10
	17	650
-	8	9 8 5
	8	6 6 5

Thus, $8\ell\ 665\text{ml}$ oil is left in the tin.

REVISION WORK - 2

B. Solve the following questions.

- 12) A man buys 6kg 600g potato, 4kg 700g tomatoes and 3kg 250g onions.
How much do these vegetables weigh together?

A man buy total potato = 6kg 600g

The man also buy total tomato = 4kg 700g

The man also buy total onion = 3kg 250g

he total bought =

	k g	g
	6	600
	4	700
+	3	250
	14	550

So, **14kg 550g** these vegetable weigh together.

LEARNING OUTCOME:

Students are able to recall the chapter through this revision work.

THANKING YOU
ODM EDUCATIONAL GROUP
