

Chapter- 02

LAND, SOIL AND WATER RESOURCES

WORKSHEET

SUB-TOPIC: Land Resource, Land Use, Land Degradation, Land Conservation

1. What is land use? (1)
2. What is the various classification of land? (3)
3. What are common property resources? (1)
4. Which land is known as arable land? (1)
5. List the factors which control the utilization of land. (3)
6. Name the various purposes for which land can be used. (3)
7. Illustrate effects of changed land use on our daily life? (5)
8. What is land degradation? (1)
9. What are the ways for land conservation? (3)

SUB-TOPIC: Soil as Resource, Soil Formation, Soil Profile, Soil Erosion, Soil Conservation

10. What are soil horizons? (1)
11. Explain the factors affecting soil formation? (5)
12. Explain the various soil horizons present in the soil profile with diagram. (5)
13. Which factors lead to land degradation? (3)
14. Discuss the agricultural practices that can be adapted for soil conservation. (5)
15. What is contour ploughing? (1)
16. What does soil provide us? (3)
17. Write a short note on the soils of India. (3)
18. Discuss any four methods of soil conservation. (5)
19. A large percentage of soil in India is a waste land. Find out various ways in which this waste land can be made useful. (5)

SUB-TOPIC: Water Resource, Water Distribution, Water Uses, Water Sources in India, Water Pollution, Water Conservation

20. What do you know about distribution of water on the earth? (3)
21. Write uses of water. (3)
22. What are various water resources of India? (3)
23. What are the factors responsible for the shortage of freshwater? (3)
24. Write difference between perennial rivers and seasonal rivers with example. (3)
25. What do you understand by multi-purpose projects? Why they are useful? Give example. (5)
26. Write about water pollution. (5)
27. Explain the different methods to conserve water resources. (5)
28. Why is there uneven distribution of water resources in the world? (3)
