Related video – Natural Resources

Water

- Water is a renewable natural resource essential for life.
- Humans, animals and plants all need water to live.
- We need water to drink, bathe, wash, irrigate fields and for many other purposes.
- Water is a precious resource.
- We should not waste water.

Water

is life

- Conservation and management of water are essential for the survival of mankind, plants and animals

Forest

- **Forest is a large area of land where there is a thick growth of trees and other plants.**
- **In a forest, plants grow on their own.**
- **The kinds of plants that grow in a forest depends on the climate and soil of that place.**

Uses of forest:

They provide us

- Wood
- Medicines
- Paper
- Oxygen

- **To save a forests, trees should be cut in a planned way.**
- **For every tree cut, several new trees should be planted, so that the forest cover is not reduced.**

Animals:

- ❖ Animals raised by us for our use are known as livestock.
- ❖ They are useful to us in many ways and are important natural resource for us.
- ❖ Some animals are raised by humans are cattle.
- ❖ For examples:
 - ❖ Cows
 - ❖ Buffaloes
 - ❖ Sheep
 - ❖ Goat
 - ❖ Camel
 - ❖ Hens
 - ❖ Duck
 - ❖ Fish
 - ❖ other water animals

Answer the following questions:

Q1. What are natural resources? Name four natural resources?

Ans. Natural resources are the valuable things in nature that are necessary for us to live on this Earth are known as natural resources.

The four natural resources are:

- a) Air**
- b) Sunlight**
- c) Soil**
- d) water**

Q2. What is the difference between renewable and non-renewable resources?

Ans.

Renewable resources	Non-Renewable resources
Those resources that will either never run out or constantly renewed by natural processes.	Those resources which once used up, are exhausted and are either not renewed by nature or renewed very slowly over millions of years.
Example - Sun, Water	Example - Coal, Petroleum

HOMEWORK

Write the minerals found in odisha with their location in the notebook.
