

Name: Abdulla sub: SCIENCE sec: A class: V

chap: 12 topic: life supports

type: WORKSHEET

Choose the correct answer

1. What is/are the importance of atmosphere ALL of the above
2. Which layer of atmosphere merges with the space exosphere
3. The gas useful to plants for photosynthesis carbon dioxide
4. The process of settling down of heavy insoluble impurities in water sedimentation
5. The gas that protects us from the harmful ultraviolet rays from the sun found in stratosphere

Fill in the blanks

Argon is used to produce colourful glow in glass tubes

2 Plants get nitrogen from with the help of bacteria

3 Air exerts pressure in all directions

4 The purest form of natural water is rain water

5 soluble impurities can be removed from water by evaporation

III changes the underlined word to make the statement correct

1 Space shuttles moves in the mesosphere layer  
thermosphere

The atmosphere  
2 Hydrogen is used is held in around the  
earth by the sun's gravity Earth

3 Hydrogen is used to produce a colourful glow  
in glass tubes argon

4 The cold drink comes up in the straw because of the  
pressure of water air

5 The burner is used to cool the water vapour in the process of distillation condenser

IV Give answer in one word

1 The thick blanket of air that surrounds our planet  
atmosphere

2 The amount of water vapour present in air humidity

3 The method of disinfecting water with a small amount  
of chlorine chlorination

4 This water is used in car batteries distilled water

5 The gas used for burning oxygen
