1 Which one the following is a basic life support system?

(a) Music system

(b) Environment

(c) Transportation

(d) None of these

(2) Which one of the following is created by nature?

(a) Cars, scooter, and buses

(b) Mountains, rivers and trees

(c) Roads, book, pen and copies

(d) all of these

3. The domain of water is referred to

(a) hydrosphere

(b) lithosphere

(c) atmosphere

(d) biosphere

4. What do plant and animal Kingdom make together?

- (a) Biosphere
- (b) Hydrosphere
- (c) Atmosphere
- (d) All of these

~~5. What do plant and animals~~

5. Which one of the following animals is called the ship of the desert?

- (a) Camel
- (b) Goat
- (c) cow
- (d) Dogs

6. When is the World Environment Day celebrated every year?

- (a) 25th December

(b) 23rd June

(c) 26th January

(d) 5th June

7. Who interacts with the environment and modify it according to their need?

(a) Human beings

(b) Animals

(c) Rivers

(d) Mountains

8. Which interact with the environment and modify it according to their need?

8. Which one of the following is not a threat to environment.

(a) Growing population

(b) Growing plants

(c) Growing industries

(Q) All of these

Very short question

1. Why is our environment changing?

Ans → Our environment is changing because our needs are increasing day by day. To fulfill these needs.

2. How do human beings modify the environment?

Ans → Human beings modify the natural environment around them to benefit us. We modify the environment by building farms to grow food.

3. Distinguish between biotic and abiotic environment.

Abiotic factors are the non-living things of an ecosystem.

Biotic factors comprise of the living things of an ecosystem.

4. Explain ~~exp~~ examples the different components of environment?

Ans The four major components of environment include lithosphere, hydrosphere, atmosphere and biosphere, corresponding to rock, water, air and life respectively.

~~Exp~~

5. What is environment?

all the living thing and non-living thing in our surrounding is called environment.

⑩ Short Question

1. What ^{comprises} ~~composes~~ natural environment?

Ans) The natural environment consists of land, water, air, plants, and animal.

This natural environment refers to both biotic and abiotic conditions.

2. Describe lithosphere and hydrosphere?

Ans The lithosphere consists of solid rock and minerals. The hydrosphere consists of water in all its forms.

3. Give an account of the atmosphere.

Ans The layer of air that surrounds the earth.

Ans Atmosphere is thin layer of air that surrounds the earth. The atmosphere is a mixture of gases, dust and water vapour.

4. Define the term ~~Biosphere~~ Biosphere.

The biosphere is the narrow zone of contact between land, water and air, where life forms exist.

can't

deserts are @ - camel, Grevy's zebra, sand

The name of some animals found in

7. Name some animals found in deserts.

the whole year

Climate here is almost hot and dry throughout

Rajasthan has no coastal region that's why the

currents affect a lot in the Kerala's weather

As Kerala have coastal region that's why even

of Kerala and Rajasthan.

6. Compare and contrast the climatic conditions

as ecosystem

and abiotic organisms live together is known

The term ecosystem means where all biotic

(5) Will you understand by the term "Ecosystem"

8. Why do the animals and vegetation vary from place to place?

Animal and vegetation vary from place to place due to variations in environment.

They adjust to different climatic conditions.

9. What forms the ecosystem? Give some example of ecosystems.

Ans. All the animals, plants and human beings depend on their immediate surrounding.

They are ~~also~~ also interdependent on each other for food and ~~rain~~ ex- desert, grassland,

mountain, lake etc.

mountain, lake etc.

10. Do you think the park in which Raw and his friends played formed an ecosystem? Explain.

Ans. Yes the park that me and my friends play in forms an ecosystem.

Explanation:-

* For an ecosystem to form the natural system that functions almost independently.

long question

1. What has brought a change in interaction between humans and their surrounding?

Human social systems have to adapt to their specific environment. Natural phenomena like storms, earthquakes force people to react. These natural ~~phenomena~~ phenomena can either be directly or not primarily caused by human actions and again influence human behavior.
