CHAPTER - 11

WORKSHEET

(A) Fill in the blanks

① Unit fractions are those fractions whose numerator is always 1.

② Like fractions are those fractions which have the same denominator.

③ Fractions that are not like, they are known as ~~like~~ unlike fractions.

④

④ Fractions having the same value are known as Equivalent fractions.

⑤ The number of equal parts are wh

has been divided into is called the  
equivalent \_\_\_\_\_ of the fraction.

⑥ CHOOSE THE CORRECT ANSWER

⑥ In  $\frac{7}{13}$ , 7 is the numerator

⑦ In  $\frac{8}{15}$ , 15 is known as denominator

⑧ Write the fraction if  $N = 3$  and  
 $D = 13$   $\frac{3}{13}$

⑨ The fractions these are having  
different denominators, are  
known as unlike fractions

⑩ The fractions in which the  
numerator is always 1

⑪  $\frac{3}{5}$  and  $\frac{9}{15}$   
multiply both  $\frac{3}{5}$  and  $\frac{9}{15}$

$$\frac{3}{5} = \frac{9}{15}$$

$$= 3 \times 15 = 9 \times 5$$

~~1/3~~  $3 \times 15 = 45$   
 $9 \times 5 = 45$

The fractions are equivalent

(12)  ~~$\frac{6}{11} = \frac{12}{22}$~~   $\frac{6}{11} = \frac{6 \times 2 = 12}{11 \times 2 = 22}$

~~$\frac{12}{22} = \frac{12}{22}$~~

$$\frac{6}{11} = \frac{6 \times 3 = 18}{11 \times 3 = 33}$$

(13)  $\frac{8}{14} = \frac{8 \div 2}{14 \div 2} = \frac{4}{7}$
