

Climate Worksheet

1.1. Earth is divided into 3 heat zones

2. The word torrid means extremely hot.

3. The amount of water vapour in the air is called Humidity.

4. The average ^{weather} condition of a place over a long period of time is called climate.

5. Temperate zone has a moderate climate

11.1. ~~The condition~~ places near the sea experience high humidity. T

2. The North Frigid Zone lies between Arctic circle and North pole. T

3. Land absorbs heat faster than water. T

4. When the humidity is a low, we feel sticky and hot and sweat.

5. The sun-rays fall directly on the poles. F

III:1. The condition of atmosphere at a particular place and time. Weather.

2. The zone which lies near the equator tropical zone.

3. The heat zone between Arctic Circle and tropic of cancer Torrid zone.

4. Among three zones this is the coldest one. frigid

5. Scientists who study predict the weather meteorology.

IV: 1. Altitude - a. height.

2. Places near equator - ~~receives~~ receives maximum heat. maximum heat

3. Frigid zone - a. cold climate

4. Height above the sea level - b. factors affecting climate

5. Torrid zone - a. ~~receives maximum~~ receives maximum hot climate
