- (v) Paint Inside

4. How to draw a star in Animate CC?

Ans → To draw a star in Animate CC we have to follow the following steps:-

- (i) Select the PolyStar Tool from the Toolbox.
- (ii) In the Property Inspector, click on the Options button ~~from~~ under the Tool Settings option. You will get the Tool Settings dialog box. Click on the drop-down list of Style option and select the Star sy style.
- (iii) Enter the value that ranges from 3 to 32 in the Number of Sides text box.

④ For the Star point size, enter the numbers between 0 and 1 to specify the depth of the star points. A number closer to 0 creates deeper points. For drawing a polygon, you do not need to change these settings.

⑤ Click OK to close the Tool Settings dialog box.
