Answer the following questions :

① What do you mean by minerals?

Ans:- A natural substance found in the Earth surface is made up of rocks. Rocks are made up of substances called minerals. Minerals are another important natural resource.

② Distinguish between renewable resources and non-renewable resources?

<u>Ans</u> Renewable resources	Non-renewable resources
Those resources that will either never run out or constantly renewed by natural processes.	Those resources which once used up, are exhausted and are either not renewed by nature or renewed very slowly over millions of years.
Ex) Sun, Water	Ex) Coal, Petroleum
