Q1) What do you mean by minerals?

Ans - A natural substance such as found in the earth such as coal, oil

Q2) Distinguish between renewable resources and non-renewable resources?

Ans - Renewable Resources

Renewable Resources are those that will either never run out or are constantly renewed by natural processes.

Non-renewable Resources

Non-renewable resources are those which once used up are exhausted and are either not renewed by nature or renewed very slowly over millions of years.
