

Chapter-12

Our Life Support (Worksheet)

I. Choose the correct answer.

1) What is / are the importance of atmosphere?

Ans- a) It protects us from UV rays of the sun.

b) It protects us from meteorites.

c) It retains heat of the sun.

d) All of the Above

2) Which layer of atmosphere merges with the space?

Ans- d) Exosphere.

3) The gas useful to plants for photosynthesis.

Ans - a) Carbon dioxide

4) The process of settling down of heavy insoluble impurities in water.

Ans - c) Sedimentation

5) The gas that protects us from the harmful Ultraviolet rays from the sun is found in?

Ans - a) Troposphere

11) Fill in the blanks.

1) Neon and Argon is used to produce colourful glow in glass tubes.

2) Plants get nitrogen from with the help of decomposers in the soil.

3) Air exerts Pressure in all directions.

4) The purest form of natural water is rain

5) Soluble ^{water} impurities can be removed from water by evaporation.

III Space shuttles move in the mesosphere layer.

Ans - Thermosphere.

2) The atmosphere is held in around the earth by the sun's gravity.

Ans - 3) Earth's.

3) Hydrogen is used to produce a colourful glow glass tubes.

Ans - Argon and Neon.

4) The cold drink comes up in the straw because of the Pressure of water.

Ans - Carbon dioxide

5) The burner is used to cool the water vapour in the process of distillation.

Ans - Condenser.

IV. Give answer in one word.

1) The thick blanket of air that surrounds our planet.

Ans- Atmosphere.

2) The amount of water vapour present in the air.

Ans- humid.

3) The method of dis-infecting water with a small amount of chlorine gas.

Ans- Chlorination

4) This water is used in car batteries.

Ans- Distilled water.

5. The gas used for burning. Oxygen.
