

GEOMETRY

A. Fill in the blanks

1. Line segment has two end points

2. Line has no end points

3. The Lines or Line segments which cross each other at any point are known as Intersecting Lines

4. The Length of a boundary of a circle is known as its circumference

5. $\text{Diameter} = 2 \times \text{Radius}$

B. Choose the correct answer

6. $\text{Radius} = \frac{\text{Diameter}}{2}$

a) Centre b) Diameter c) Circumference d) None

7. Diameter is Twice the radius of a circle.

a) Twice b) Once c) Thrice d) None.

8) The Lines which do not meet at any point no matter in whatever direction we ~~continue~~ continue, are known as Parallel Lines

a) Intersecting b) Parallel c) Curved d) None

9) A Line ~~has~~ has No ~~end points~~ end points.

a) One b) Two c) No d) Three

10) $D = 2 \times$ Radius R

a) R b) P c) S d) None

C. Answer the following Questions.

11. Find the radius of the circle whose diameter is 44 cm

$$\begin{array}{r} 22 \\ 2 \overline{) 44} \\ \underline{44} \\ 0 \end{array}$$

Ans $44 \text{ cm} \div 2 = 22$

So, the radius of the circle is 22 cm

12. Draw a circle and also mention its radius and diameter. Also write 3 circular objects Name that you see in your day to day life.

Ans

clock

Toy wheel

Bangles

13. Draw a line segment CD of 8 cm.

Ans

Line segment

14. Find the diameter of the circle whose radius is 13 cm.

13 cm

$$13 \text{ cm} \times 2 = 26 \text{ cm}$$

So, The diameter is 26 cm

Q. Draw an example of parallel line and ~~Intersecting~~ Intersecting line.

Ans

→ Parallel Line

↓
Intersecting Line
