

Homework

1. He can turn a straight line into a ~~so~~ curve with the selection tool.

2. Pen tool is used to ~~draw~~ draw ~~precise~~ precise paths in the form of straight lines or smooth flowing curves. He can also adjust the angle and length of the straight segments, and the slope of curved segments afterwards.

3. The various options available with Brush Tool are as follows:

1. Paint Normal

2. Paint Fill

3. Paint Behind

4. Paint selection

5. Paint inside

4.

We can draw star in Animate CC by using the polystar tool.

- Select the polystar tool from the Toolbox.
- In the Property Inspector, click on the options button under the Tool Settings option. You will get the Tool Settings dialog box. Click on the drop-down list of style option and select the Star style.
- Enter the value that ranges from 3 to 32 in the Number of Slides text box.
- For the Star point size, enter the numbers between 0 and 1 to specify the depth of the star points.
- Click OK.
- Click and drag the pointer on the stage to draw a star.
