

Climates

Worksheet

(1) Fill in the blanks

1. Earth is divided into three heat zones.
2. The word torrid means extremely hot.
3. The amount of water vapour in the air is called moisture.
4. The average weather condition of a place over a long period of time is called climate.
5. Temperate zone has a mild climate.

11. State True or false

1. Places near the sea experience high humidity -
T
2. The north frigid zone lies between Arctic Circle and the north pole -
T
3. Land absorbs heat faster than water = F
4. When the humidity is low we feel sticky and hot a sweat a lot - T
5. The sun rays fall ~~at~~ directly at the poles -
F

III Write is in one word

1. Condition of the atmosphere at a particular place and time - Weather
2. The zone which lies near the equator = Torrid zone.
3. The heat zone ~~we~~ between Arctic circle and tropic of ~~cancer~~ cancer = North temperate zone.
4. Among the three zones ~~the~~ this is the coldest zone = Frigid zone.
5. Scientists who study predict the weather - Meteorology

IV Match it

1. Altitude
 2. Places near the equator
 3. Frigid zone
 4. Height above the sea level
 5. Torrid zone
- cold climate
- factors affecting climate
- height
- hot climate
- receives maximum heat
-
- The diagram shows the following connections:
- 'Altitude' is connected to 'height'.
- 'Places near the equator' is connected to 'receives maximum heat'.
- 'Frigid zone' is connected to 'cold climate'.
- 'Height above the sea level' is connected to 'height'.
- 'Torrid zone' is connected to 'receives maximum heat'.
- 'cold climate' is connected to 'factors affecting climate'.
- 'height' is connected to 'factors affecting climate'.
- 'hot climate' is connected to 'factors affecting climate'.
- 'receives maximum heat' is connected to 'factors affecting climate'.
