

## Chapter - 8

# MEASUREMENT

## WORKSHEET

I. Fill in the blanks:

a) My pen is 10 cm long.

b) The length of a river is measured in meter.

c)  $1\text{ m} = \underline{1000}\text{ cm}$

d)  $1\text{ kg} = \underline{1000}\text{ g}$

II. Do as directed

A) Convert the following into centimetres:

1)  $14\text{ m } 30\text{ cm}$

2)  $83\text{ m}$

$$14\text{ m} = 14 \times 100 = 1400$$

$$= 83 \times 100 = 8300\text{ cm}$$

$$14\text{ m } 30\text{ cm} = 1400\text{ cm} + 30\text{ cm} = 1430$$

B) Convert the following into metres,

1) 796

2) 796

$$796 \div 100 = 7\text{m } 96\text{cm}$$

$$796 \div 100 = 7\text{m } 96\text{cm}$$

C) Circle the weights that you will use to measure the following:

1) 2kg apples

200g

100g

500g

1kg

2kg

500g

D) Tick the things are used to measure length:
