

# Chapter-3

## Working With Tables

1. Fill in the blanks.

- Table is an organized arrangement of text in rows and columns.
- Formula button is present in Data group.
- F9 function key is used to updates the calculations automatically in a Table.
- Tab key or right arrow key is used to move to the next adjoining cell in a Table.

2. Write 'T' for true and 'F' for false.

- The intersection of row and column is called Table. (F)
- Once you insert a Table you cannot modify it. (F)

c) You cannot insert Table by using Table grid. (False)

d) Table styles feature is present in Layout Tab. (F)

3. # Answer the following.

a) What is Table? what is a cell?

Ans - → A table is an organised arrangement of text in the form of rows and columns.

→ The intersection of a column and row is called a cell.

b) write the difference between splitting and merging of cell:

<u>Splitting</u>	<u>Merging</u>
→ Splitting a cell means dividing the selected cell into separate cells.	→ Combining two or more cells into a single cell is called merging.

(c) Differentiate between Table move handle and Table resize handle

Ans- Table move handle is used to move the table whereas Table resize handle is used to resize a table.
