

Chapter- 15

Geometry ✓

WORKSHEET

A. FILL IN THE BLANKS :

1. An angle measuring 180° is called a Abtuse angle ✓ ~~Strc~~
2. The common starting point of an angle is called the _____ of the angle.
3. A right angle measures 90° .
4. To measure an angle in degrees, we use a protractor.
5. A triangle whose all sides are equal is called a equilateral triangle.

B. CHOOSE THE CORRECT ANSWER :

6. A line segment has two end points
- i) One end point ii) no end points iii) two end points iv) none of these
7. Which of the following represents a line? axis of earth
- i) Side of a square ii) edge of cube iii) axis of earth
8. A point has no length, breadth or thickness.
- i) point ii) line iii) line segment iv) ray
9. Identify which of the following is symmetrical?

iii) 

C. DO AS DIRECTED:

10. Draw the following angles using a protractor :

- a) 95° b) 45°

Ans.

11. What type of triangles are these?

equilateral

Scalen Right traiangle

12. Find the area of the triangle.

$$\frac{16\text{cm}}{AB} + \frac{18\text{cm}}{BC} + \frac{15\text{cm}}{AC}$$

$$\begin{aligned} \text{Area} &= AB + BC + CA \\ &= 16\text{cm} + 18\text{cm} + 15\text{cm} \\ &= 49\text{cm} \end{aligned}$$

13. Name the sides, angles, and vertices of the given triangle.

Sides = AB, AC, BC Angles = ∠ABC, ∠BCA, ∠CAB Vertices = A, B, C

14. Classify each angle as acute, obtuse, right or straight.

obtuse angle

obtuse angle

[]
