enters the eye Pupil

5 The main organ of taste Tongue

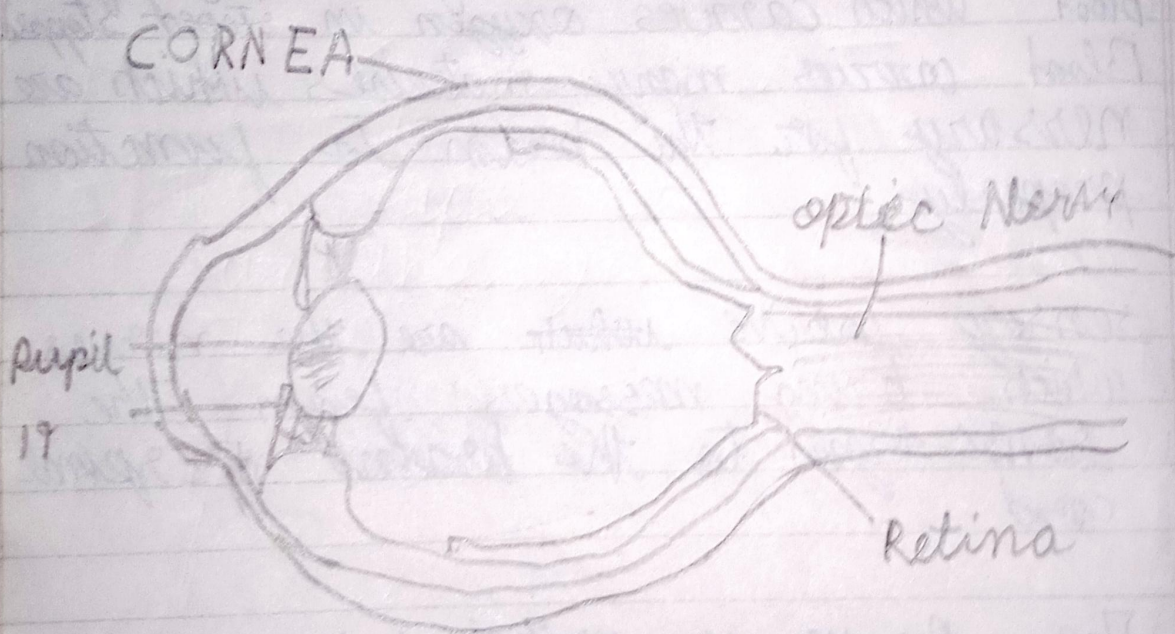

11 ~~the~~  Ear in the blanks

1 ear help us to balance  
our body

2 The largest part of the Brain  
is the Cerebrum

White blood cells

The brain needs a continuous supply of blood oxygen because the cell present in the brain will die if supply of blood which carries oxygen is stopped.

The brain is protected by a hard bony shell. The space between the skull and the brain and also the inside of the brain is filled with a clear fluid called cerebrospinal fluid.

If the brain is injured, the cerebrospinal fluid acts as a shock absorber and protects the brain.

metabolic system
