

# Worksheet

## Earth's Interiors

- 1) As we travel to the centre of the earth the temperature inside it increases.
- 2) As we travel down the pressure increases the more.
- 3) The three main layers that makes up Earth's interior are:-
  - \* Crust
  - \* Mantle
  - \* Core
- 4) The crust of the Earth is made up of silica and ~~aluminium~~ aluminium which is together called as SIAL.
- 5) True.
- 6) The two types of Earth's crust are:-
  - \* Oceanic Crust
  - \* Continental Crust

- 1) NO, it is not thicker than the continental crust.
- 2) The mantle ~~of~~ is ~~consists~~ consists of iron, magnesium, aluminium and silicon.
- 3) The ductile makes up the lithosphere.
- 4) magma
- 5) Mantle is about 2900 ~~to~~ km deep under Earth.
- 6) The two parts are inner core ~~and~~ and outer core.
- 7) The two metals which make up the two parts of core are Iron and nickel that is NIFE.

(B)
