Draw any 3 types of birds with different beaks.

Duck

Ducks have broad and flat beak and it also has tiny holes on the sides.

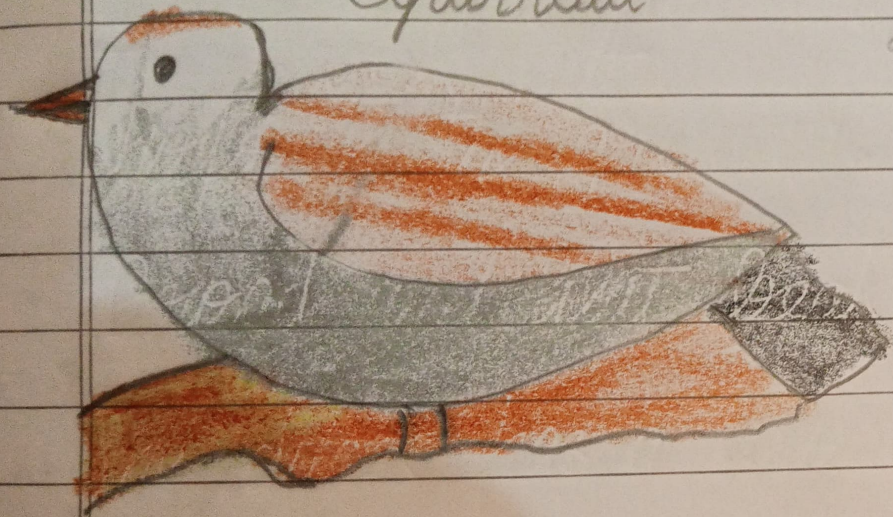

- The duck takes in muddy water with insects, worms and water plants. The mud and water blow out through the tiny holes leaving the plants and insects inside the beak.

Owl

Owl have strong, sharp and hooked beak and it is a bird of prey. It eats small animals like mice and frogs. It uses it's beak to tear flesh also.

Sparrow

S Sparrows have short, hard and heavy beaks to crush grains and seeds.
