

# 4

## Comparison of Numbers

### 4.1 Equal and Unequal

There is one extra apple in basket A.

So, we say that there are unequal number of apples in the two baskets.

Neha took 1 apple from basket A.

Now, there are equal number of apples in both the baskets. The symbol ( $=$ ) means that the numbers on its either side are equal. e.g.  $4 = 4$

### Exercise

Put the sign ' $=$ ' or ' $\neq$ '.

(a)  $12 \neq 17$

(c)  $57 \neq 51$

(e)  $64 \neq 44$

(b)  $33 = 33$

(d)  $70 \neq 80$

(f)  $92 = 92$
