

Nuclear Family

By - Abhishek

"Family is like a music, some high notes, some low notes but a beautiful song"

The concept of the nuclear family arose right after the industrial revolution. It is a family in which there are parents and usually less than 4 children. Some people see it as a concept of greediness and some as the destruction of the very essence of life. Contradictory to this belief, many nuclear families lead a healthier and happier life than with so many people having access to their information. People tend to stay separate from their families also because they want to see the world as it is by their own eyes and not some ~~of~~ superstitious beliefs like ~~for~~ flat earth. These types of families have rather mixed emotions and their kids have a balance between study and play time. So nuclear families aren't that 'bad' just a bit different.
