Q7A. More people live in the ~~south~~ south of Greenland than in the north.

Why do you think this is so? 2. Why Icebergs are dangerous for ships?

Ans- More people live in the south of Greenland than in the north because the south-western ~~coast~~ coast of Greenland is the warmest part of the country.

Q. Ans- Ice-bergs are actually much larger than they seem. This is because when an iceberg floats on water most of it remains under water. So they pose great ~~dangerous~~ danger to ships in the sea.
