

Exercise - 3(H)

Estimate the following by rounding off to the nearest 10.

i)  $\underline{837}$

ms  $\underline{840}$

(ii)  $\underline{1241}$

$\underline{1240}$

(iii)  $8345$

$\underline{8350}$

v)  $6782$

$\underline{6780}$

(ii) Number of students are 1832, 1527 and 2572 respectively.

Rounding off to the nearest 100, we get

$$1800 + 1500 + 2600 = 5900$$

The difference from the actual sum

$$= 5931 - 5900 = 31$$

$$\begin{array}{r} 1800 \\ 1500 \\ + 2600 \\ \hline \end{array}$$

5

Estimate  
the nea

### Exercise 3(H)

Estimate the following by rounding off to the nearest 10.

(i)  $837 \rightarrow 840$       (ii)  $1241 \rightarrow 1240$       (iii)  $8345 \rightarrow 8350$       (iv)

Estimate the following by rounding off to the nearest 100.

(i) 887

(ii) 3215

(iii) 8432

(iv)

Estimate the following numbers to the nearest 100.
