Autumn
Holiday Homework

1. __autonumber__ data type Generate sequential number whenever record is added.

2. _____ data type is used to embed an object created in ~~the~~ another of application

3. We can add images by using __Parent__ fields.

4. __Integer__ datatype is used when a user creates a table field that calculate values

5. Access sets lookup fields to the __Insert__ data type

6. The __Star__ topology handle large no of traffic.

7. In __Star__ topology all the nodes in the network are connected in a circular manner.

8. In star topology the central server act as __~~the~~ Server__

9. __Bus__ topology two nodes are directly connected.

10. Network architecture is divided into __2__ types.

11. Wi-Fi use __Radio wave signals__.

12. A network contained maintained without using wires is called __wireless network__.

13. __LAN__ and __WAN__ are the different of networking.

14. Network __topology__ refers to the layout in various components of network are connected to each other and communicate to each other.

15. __Data__ security means protecting data and resources from any unauthorized access.

16. __Wifi-router__ is a device connects wireless communication devices to form a wireless network.

17. __ADO__ property contains the condition in the basis of which the records will be filtered in the query output.

18. A _form_ is a piece of papper on which a user fills the required information in specific fields.

19. A _View_ is a database object that helps you to retrieve and view information frome one or more database tables.

20. In a query, the _ADD_ propedy is used to set the ~~basis of which the records will be fired~~ condition on the basis record.

21. You can set multiple criteria in a query using _sort_ propedy

22. _sort_ property is used to filter that data either in an ascending order are descending order.

23. A _Database_ allows you to add and update data in a table, one record at a time.

24. A _pivot table_ is an effective way to ~~organize~~ organize and summerize data in a printed form.

25. There _7_ types of operators in Python.

26. The statement that governs the flow of a program are called __control flow__

27. The __attribute__ of a variable is an attribute that tells what kind of data can a variable have.

28. Concentration is __binary__ operator.

29. The __Constructors__ construct encodes the the statements in a sequen manner.

30. __file Interactive__ mode of python giving the output instantly
