ITEMS MADE WITH BAMBOO

- Bamboo is very useful to our environment.
- Bamboo is the fastest plant to grow.
- Bamboo roots help to control soil erosion.
- Bamboo reduces 35% more carbon dioxide from air and releases more oxygen.
- Bamboo, unlike many other textile crops, can grow anywhere.
- Unlike regular hardwood trees, a bamboo crop will continue to produce for years years. So it is a highly renewable resource.
- Bamboo can replace traditional hardwood for making furniture to flooring to building materials.
