## HOMWORK

Q) Ramu, the gardener, is trying to pull out weeds. However, he has to apply great force. Why do you think he has to apply so much force?

Ans:- The weeds with shallow roots can be removed by hands but some weeds are deep rooted and branched, thus strongly anchor the soil.

The deep rooted weeds can be removed using a shovel ~~or~~ or a push hoe. These can be removed by digging deep in the soil so that the soil which is in tight contact with the weed can be removed.
