Q22 Ans- The greatest 8-digit

number = 9,99,99,999

the smallest 9-digit = 1,00,00,000

The number is

$$\begin{array}{r}
 99999999 \\
 - 10000000 \\
 \hline
 89999999
 \end{array}$$

Ans- The number is 1.

Q23 Ans- Rosy had with her

$$\begin{array}{r}
 75000 \\
 - 10000 \\
 \hline
 65000
 \end{array}$$

she purchased a car for = ₹12,50,990

money was left with her = ₹49,010

Ans- money was left with her is

₹41,49,010.

24) Five years ago, the population of a town was = 41,37,108

Now the population is = 60,48,991

$$\begin{array}{r} \text{The increase population} = \begin{array}{r} 60,48,991 \\ - 41,37,108 \\ \hline 19,11,883 \end{array} \end{array}$$

So, the increase population is 19,11,883.

25) The population of a town = 3,48,311
 women = 1,25,387
 children = 95,384
 2,20,771

The number of men in the town.

$$\begin{array}{r} = 3,48,311 \\ - 2,20,771 \\ \hline 1,27,540 \end{array}$$

So, the number of men in the town is 1,27,540
