## Value education

Q1. Ans. We should develop a positive attitude towards our parents.

We should be humble to them & consider their point of view.

We should not be rude with them. Good communication can bridge the generation gap between us & our parents.

Let them feel proud of raising us to be a successful individual.

When we give them our full attention ~~then~~ they will feel more connected with us.

Our parents will love to be involved in our decision, so we should ask them their opinion.

We should share our good news & achievements with them.

We should always be grateful & warm hearted towards them.

We should not raise our tone with them.

We should pray God, that gives them all happiness of the world.

We should love them, respect them, & obey

them as much as possible.

~~Q1 Ans~~ We should ~~not~~ give our full attention to our teachers while teaching.

They provide knowledge to us & taught us how to read & write & how to become a good person in our life.

We should come to class on time.

our teachers inspire & motivate us for our bright career.

⊙ So we should respect them from our heart.

Q2- Ans > In this world people are more concerned with themselves, they seek more money, fame power. We think being served is more fulfilling but the truth is something else. To serve is actually more fulfilling.

The day I got more pleasure, happiness & fulfilment by rendering services to the needy ones. It was a day when I went to an orphanage with my parents to celebrate my birthday with the kids. As planned we celebrated the birthday party at 11 am ~~am~~ which ended after an hour. Everything thing was going well until I found that the kids don't

have books & other things that they need. I asked few of them about their needs & helped them by buying the books & important things which they needed after having ~~that~~<sup>what</sup> they needed, they smiled joyfully & experienced this unexpected happiness & fulfillment.

There are people who always need our help. We just need to look around. Real joy is found not in being served, but choosing to serve.
