LIGHT

2/11/2021

Q1 -

Define light energy.

Ans-

Light energy is a form of energy that affects our eyes to produce the sensation of vision.

Q2 -

Differentiate luminous and non-luminous object.

Ans -

Luminous Object

- The bodies which emit their own heat and light are called luminous bodies.
- They shine and glow by their own light.
- Ex - Sun, stars, Torch

Non-luminous object

- The bodies which do not emit their own light are called non-luminous bodies.
- They shine by when some other object ~~light~~ produce light.
- Ex - Book, chair, table
