

SOIL CONTAINS

24-6-21

1- Jar - Part of dead plants and insects.

2- Soil.

3- Water. soil from a garden put it into an empty jar

Collect some soil from a garden put it into an empty jar then fill the jar with water cover it with a lid and shake well. Allow the mixture to stand for fifteen minutes.

What does ?

After fifteen minutes we will see the stones settle down at the bottom. The grains of sand are seen above the stone. The clay settles down above the sand.

The water above the top layer is not very clear float dead plants parts and insects in it.
