## Paragraph on Indian Rivers

The rivers play a major role in lives of people. They provide us with irrigation. The rivers also help in completing the water cycle. There are many rivers but the major rivers are Ganga. The Ganga is a holy river according to Hindu. It has started from Gangotri. Cities like Allahabad, Varanasi, Kashi, Kolkata etc are developed near this river. Then Yamuna. Yamuna originated from Yamunotri Glacier. Its total length is around 1375 km. The famous Taj Mahal is situated near the river Yamuna. Then Mahanadi is also a well-known river. It is originated from Sihana Mountain in Chattisgarh. The river flows through the state of Chattisgarh and Odisha. Then Narmada. It is originated in Amarkantak. It is also called the life line of Madhya Pradesh. The Narmada is the oldest river of India. There are many more rivers in India like Godavari, Krishna, Brahmaputra, Indus, Thelem, Tapi, Chenab, Hoogly etc.
